

BRIBES 4 'Licht'

BRIBES 4 «Licht» is an original creation by the BRIBES 4 quartet: a concert augmented with a light and scenographic installation.

The four musicians, arranged in a semi-circle, are backed by the raw use of shadows and lights. At the center of the stage, totemic objects conjuring up images of early human civilizations are surrounded by obscure monoliths, from which splinters and waves of light burst forth.

The uncanny atmosphere thus created takes the improvisers further into a state of mystical and avant-garde trance.
